

## **CASE STUDY WORKSHOPS & PRESENTATIONS**

Here is our list of exciting and informative cases for what are planned to be **participative workshops** about specific examples of ecosystem designs in a wide variety of sectors and geographic locations:

### **In the healthcare sector--**

- 'Community Care of Brooklyn' project developed by activists and architects including union leaders;
- Baltimore Health Department's community project that addresses patient social needs across clinical settings;
- Kaiser-Permanente & SEIU Labor-Management Partnership for innovative care delivery;
- Belgian Mental Health Care networks to strengthen ambulatory, patient-centered care;
- participative design of an innovative diabetic foot ulcer service ecosystem in Scotland;
- an innovative workforce project and ecosystem model for disability care in remote regions of Australia;
- recent developments in Satellite Health Corp.'s ecosystem model of digitally enabled home dialysis care;

### **In multiple other sectors--**

- community-driven cooperative action for affordable local fresh food access in Kentucky and Indiana;
- dynamic, disruptive design of an equitable food ecosystem involving the UFW, farm growers, and retailers;
- an ecosystem that has brought employee-owned (ESOP) enterprises into the mainstream US economy;
- Dutch military organization in Afghanistan that sought "controllability" by self-designing ad-hoc networks;
- collaboration between teachers' unions and administrators focused on student educational improvement in the New Jersey schools system.

There will also be a number of **lightning talks** and **keynote presentations** on topics such as:

- 'Organizations as Networks of Decisions' by Will Harper, an associate of The Ready organization;
- 'Creation of Integrated Care for residents of LA County' by Peter Lazes, City University of New York;
- 'Non-collaborative ecosystems in Belgian healthcare' by Sam Pless, University of Leuven, Belgium;
- 'Why Collaborative Ecosystems Now' by Charles Heckscher, Rutgers University, New Jersey;
- 'Principles for Designing Collaborative Ecosystems' by Bill Pasmore, Columbia University, New York.
